

## **Production Manager**

BAM, Bromma Air Maintenance AB, has more than 40 years of experience in the aviation business and services and performs service and maintenance of aircraft and helicopters, calibration flights, sale of spare parts, and design and production of parts and equipment for aircraft and helicopters. Our customers are governments, airlines, private aircraft owners etc.

BAM is now looking for a Production Manager responsible for Part-145 and Customer Support Centre (CSC).

We are looking for a committed, caring and prestige-free leader who is sharp, confident, and communicative. You are also solution-oriented without compromising on quality.

## **Qualifications**

Your leadership is imbued with trust and confidence, and you are skilled at leading through others and creating commitment and participation. This shows through good relationships and collaborations both inside and outside the company. You have good ability and experience in strategically planning, prioritising, coordinating, and following up on ongoing operational work and new business. You will work in a dynamic workplace with the overall responsibility for personnel, resource planning, competence development, work environment and customer contacts, and the financial result.

## **Experience**

You have a relevant engineering or technical degree, or an aircraft technician or maintenance engineer qualification and have broad experience working with an aeronautical engineering background and in project management. It is advantageous if you have documented knowledge of Part-145, Part-66 and Part-M. We would also like to see that you held a similar management position with personnel responsible for a larger team.

You have excellent skills in the Office package and are fluent in both spoken and written English. Driving license B is a requirement.

## **ASSIGNED DUTIES:**

1. Responsible for all activity and work performed at maintenance stations defined to be under your responsibility.
2. Responsible for all completed work orders that are closed and ready to be invoiced.
3. Responsible for all facilities and equipment at the maintenance stations.
4. Responsible for establishing and maintaining procedures and routines to perform the departments' scope of work.
5. Ensuring work schedules/shift plans are established at all maintenance locations.
6. Ensuring that the maintenance stations have adequate resources to perform the organization's scope of work.
7. Daily administration of personnel.
8. Providing inputs to the budget and for project applications.
9. Approve course request.
10. Responsible for approving duty travel expenses for all personnel.
11. Ensuring the availability of facilities appropriate to the planned work, including hangars, workshop office accommodation, tools, equipment, and stores, as applicable for the scheduled work.
12. Be a single point of contact for sub-contractors
13. Ensuring the availability of competent personnel to plan, perform, supervise, inspect, and certify the work being performed.
14. Hold weekly production meetings
15. Perform other duties as assigned.

**ADDITIONAL INFORMATION:**

The location will be Bromma, and duty travels will occur in Scandinavia, mainly in Sweden. The “personal suitability” factor will be highly valued in the appointment process. The position is a full-time position with a 6-month probationary period. For positions requiring security clearance, additional obligations on citizenship may apply. Applications will be screened ongoing, and this ad might close before the last day to apply. Welcome to visit our homepages to read about our services <https://bam.aero> <https://force.aero>
