

Air Medical

Stretcher Provision and Medical Rack

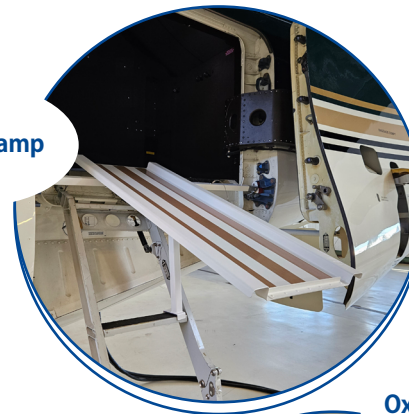

Falcon 7X

A stretcher attachment system and interior protection for the cabin divan. A welded aluminium beam construction with a locking mechanism for oxygen bottles. A portable loading ramp for on and off-loading the stretcher through the cargo door.

Features

- Quick and seamless transition between Ambulance and passenger configurations, typically accomplished within one manhour.
- Convenient ramp for loading and unloading of stretchers through the cargo door.
- Integrated rack designed to hold four medical oxygen bottles, easily accessible from the top and sides.
- Oxygen bottle rack with integrated Spring-loaded Latch for a practical and secure closure.
